Guide to Your High Performance Team Profile

Common Definitions
Items - Individual survey questions
Norms - Ground rules for appropriate behavior within groups

Four Stages of Team Development

The team development survey is based on a four-stage model of team development derived from research on group dynamics. Newly formed teams which are comprised of individuals who have never worked together before will typically begin at the first stage of development, though in rare circumstances some teams may begin in the second stage. In order to advance to the final stage, the team must pass through each phase in order. Although there may be some negative aspects to some stages, each presents great opportunity for the team to learn and grow. Conflict will occur throughout development and it should not be avoided. Conflict can help establish norms and introduce creative new solutions to problems. Throughout a team's development it is the role of the team leader to offer varying levels of direction and support to the team. Once a team has developed into the final stage, called Production, the members will require much less direction or support from the leader. Once the team has reached the Production stage, the team will effectively be able to manage itself.

Item-by-Item Results

These two graphs display the results for each survey item averaged across all team members and for the team leader individually. Take note of items where the team members' ratings differ greatly from the team leader's. It is important for team members and the team leader to have a clear understanding of where the team stands in its development so that they can advance through each stage more quickly. If a team leader thinks the team is in one stage while the members feel they are in another stage, the leader may offer a level of support or direction which is inappropriate. Displayed in parentheses next to each item is a letter representing the stage of development derived from the average of all team members including the leader.

Written Comments

Depending on team members' particular response patterns, they were asked to provide some written comments related to some sets of items. These comments are useful as a source of direct feedback from team members as to why they provided such ratings.

Current Team Progress

This section displays models detailing where the team stands in terms of its development. The first model is derived from the average responses across the whole team, while the next two models were created from only team members' responses and only the team leader's responses. The team's current stage is identified as well as the stage the team members and leader perceive to be current. Item content is displayed within a given stage depending on how favorably the team responded. Pay attention to boldfaced items as these represent priority items for the team. Focusing on priority items will help expedite the team's development towards Production.
Four Stages of Team Development

Stage 1: Orientation
- Earliest phase of team development
- Members exhibit moderate eagerness with high, and often unrealistic expectations
- Members lack clarity about their purpose and role on the team and the team's norms, goals, and structure
- Members are dependent on authority for direction and support

Stage 2: Dissatisfaction
- Members' expectations are still disconnected from reality
- Members experience some confusion and/or frustration around their roles and goals
- Cliques, coalitions, and smaller subgroups may form within the team
- Some competition for power, authority, and/or attention
- Some task accomplishment
- Low trust

Stage 3: Integration
- Members gain increased clarity and commitment in their roles, goals, and tasks as well as the team's structure
- Increased commitment to the norms and values of the team
- Growing trust, cohesion, and mutual respect
- Use of "we" rather than "me"
- Increased task accomplishment
- Tendency to avoid conflict

Stage 4: Production
- Members are clear about their purpose, roles, and goals and have adopted the team's values
- Empowering team practices help to free up team members to lead continuous improvement efforts
- Relationships and communication are built on trust, mutual respect, and openness
- Optimal productivity
- High morale

Team Survey - Item-by-Item Results

Development stage in parentheses is calculated from the average responses for the whole team
(O) = Orientation, (D) = Dissatisfaction, (I) = Integration, (P) = Production

1. There is a clear purpose for this team to exist. (I)
   Team Leader: 4.23
   Team Member Average: 4.00

2. We have clearly defined norms that enable us to work productively. (I)
   Team Leader: 4.00
   Team Member Average: 4.15

3. We deal with conflict effectively. (I)
   Team Leader: 4.00
   Team Member Average: 3.85

4. We are all committed to the team's success. (I)
   Team Leader: 4.31
   Team Member Average: 4.00

5. Our team consistently produces results that the organization values. (P)
   Team Leader: 5.00
   Team Member Average: 4.62

6. I trust the members of my team to give me the feedback I need. (I)
   Team Leader: 4.00
   Team Member Average: 3.92

7. We are able to respond to new challenges effectively. (I)
   Team Leader: 4.00
   Team Member Average: 3.85

8. There are adequate structures and resources in place to ensure the success of the team. (I)
   Team Leader: 5.00
   Team Member Average: 4.00
Team Survey - Item-by-Item Results

Development stage in parentheses is calculated from the average responses for the whole team
(O) = Orientation, (D) = Dissatisfaction, (I) = Integration, (P) = Production

9. We have high standards for the group. (I)  Team Leader: 5.00, Team Member Average: 4.31

10. We share responsibility for getting things done. (I)  Team Leader: 5.00, Team Member Average: 3.69

11. I am able to give honest and accurate feedback to members of my team regarding their performance without harming personal or professional relationships (I)  Team Leader: 4.00, Team Member Average: 3.77

12. I trust the members of my team to deliver what they promise. (I)  Team Leader: 4.00, Team Member Average: 3.85

13. The members of my team have the skills they need to function effectively in their role. (I)  Team Leader: 4.00, Team Member Average: 4.00

14. How would you characterize the morale of the group? (I)  Team Leader: 4.00, Team Member Average: 3.85

15. What is the overall effectiveness of the group? (I)  Team Leader: 4.15, Team Member Average: 4.00
Written Comments

All team members were asked to provide comments in the first question. Depending on the pattern of responses for some survey items, team members were asked to provide additional feedback through responses to additional open-ended questions. This feedback is provided below. This information will be useful towards advancing the team through each development stage.

Why does the team exist? Please describe its purpose.

*No comments provided*

What type of conflict is most difficult for this team to resolve?

* We don't deal poorly with conflict, but we could discuss small items more openly.
* inter department priorities get in the way sometimes... / inter personal conflicts not spoken but a lot of non-verbal language
Written Comments

Depending on the pattern of responses for some survey items, team members were asked to provide additional feedback through responses to additional open-ended questions. This feedback is provided below. This information will be useful towards advancing the team through each development stage.

**What is the feedback that you are not receiving that would be helpful to your success?**
- preference to complain to others rather than to give constructive feedback
- I think that some of us are worried we may hurt another's feelings if we share counteractive feedback. Also, many of us have so much work on our plate that we sometimes fail the team or miss something, it doesn't seem right to critique another when you aren't always perfect either.

**What resources or structure does the team need to be successful?**

*No comments provided*

Depending on the pattern of responses for some survey items, team members were asked to provide additional feedback through responses to additional open-ended questions. This feedback is provided below. This information will be useful towards advancing the team through each development stage.

What kind of feedback do you feel unable to share? Why?
• many team members are sensitive. do not talk to you for a while. do not know why. just stopped giving feedback to eliminate conflicts. employees told to recommend not complain; however does not work for mgmt - in some cases neither is acceptable
• Concerns about job performance.

What are the skills that the team needs, but still lacks, to be successful?
• communication the entire loop
• We make list after list of items that fall on maintenance and/or production. So, we are putting added tasks on the supervisors who insure the plant continues to produce gallons to achieve our budget. There is no mechanism to give these folks any help.
Current Team Progress - Full Team

Survey items are referenced within stages based on how they were scored by the entire team. Priority items within each stage are boldfaced and underlined.

1. Orientation

2. Dissatisfaction

3. Integration - *Actual* Stage / Members' and Leader's *Perceived Stage*
   - Commitment to Team's Success, High Standards, Team Purpose, Clear Norms, Group Effectiveness, Structures and Resources, Right Skills, Trust I Get Feedback, Conflict Management, New Challenges, Trust to Deliver Results, Morale*, Share Responsibilities, Able to Give Feedback

* Morale is an outcome variable - it is best addressed by attending to the process variables.

4. Production
   - Results
